HIGHLY ATTRACTIVE RESEARCH INTERNSHIPS AT EPFL

Since 2013, EPFL is delighted to welcome a few interns from acclaimed universities allowing them to undertake research with renowned professors in its:

- School of Architecture and Environmental engineering
- School of Basic Sciences (Mathematics, Chemistry and Physics)
- School of Computer and Communication Sciences
- School of Engineering
- School of Life Sciences

Selected students benefit from EPFL excellent infrastructures and enjoy its lively campus in Lausanne, on the shores of Lake Geneva.

Students may combine a research internship with an exchange program and consider starting with either the internship (3 months), or the semester studies. To do so, please contact the international exchange office of your home university and express your interest at researchinternships@epfl.ch.

JOIN OUR TREMENDOUS RESEARCH COMMUNITY

EPFL is one of the two Swiss Federal Institutes of Technology. It represents the quintessence of Switzerland’s innovation forces, reflected daily by the distinctions obtained by its researchers, the vitality of home-grown entrepreneurs and in the international networks established with other centers of excellence. This innovative spirit has attracted leading scientists from around the world to EPFL, and resulted in a spectacular growth of its scientific output and publications.

EPFL Facts & Figures:
- 10’000 students
- From 110 nationalities
- 350 laboratories
- Top 10 in European rankings
- Over 150 partner institutions
